1968 SHORT FORM
PRODUCT LINE SUMMARY

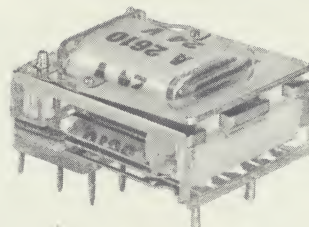

JENNINGS **ITT**

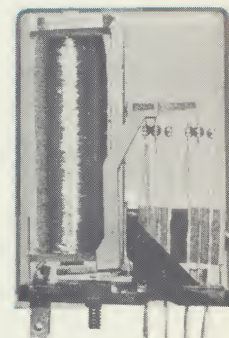

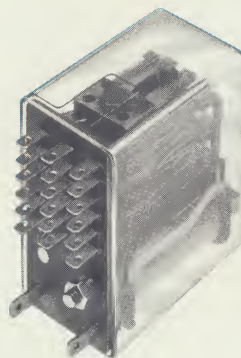

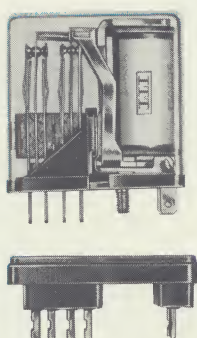

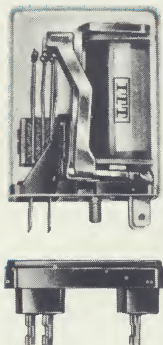

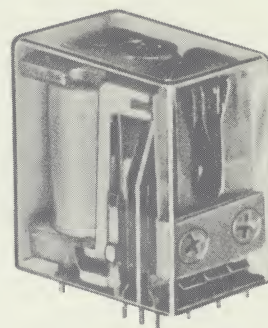

JAA Series — AC and DC coils, 1 and 2 Form C, printed circuit or solder terminals, also slow-release and magnetic-latching versions.

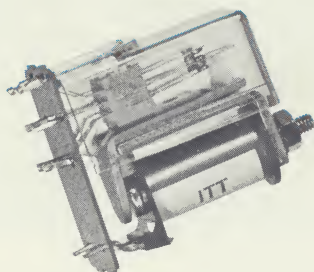

JAE Series — The most advanced printed circuit relay now available. 4 or 6 Form C, 0.4 Amp. at 30 VDC 100 million operations.

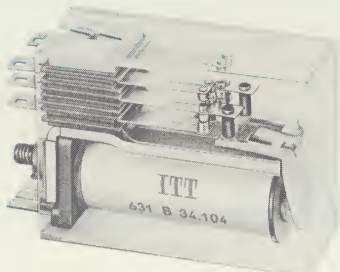

JAH Series — Modern miniature telephone relay. 4 or 6 Form C. Sockets available.

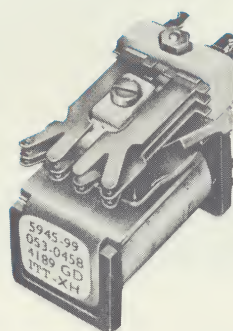

JAK Series — Professionally engineered series of cradle relays; 2, 4, or 6 Form C., sensitive long-coil version, remanent latching version, single, bifurcated, or heavy duty contacts, socket or printed circuit mounting. (Coming soon; AC coil versions).

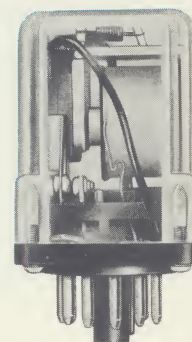

JANA — Subminiature Industrial relay for panel or printed circuit.

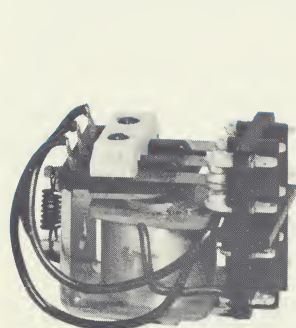

JAUA — Small telephone relay for industrial controls.

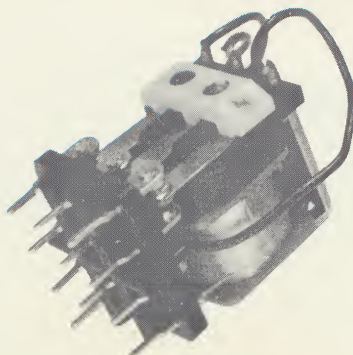

JAWA — High reliability relay. Ceramic insulation for high frequency.

JBGA — Tube base Industrial relay. Workhorse of the industry.

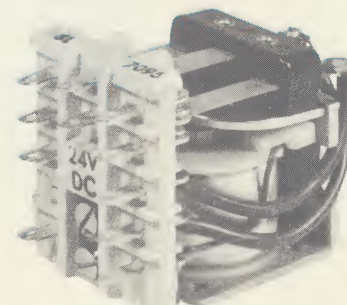

JBGC — Open Industrial relay.

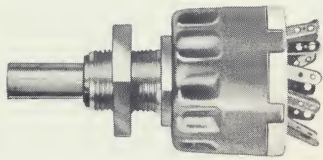

JBGD — Printed circuit Industrial relay.

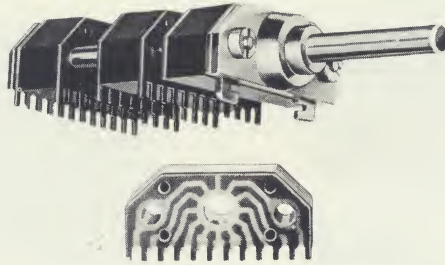

JBNA — Heavy duty Industrial plug-in relay. AC or DC coils.

JBNB — Heavy duty open Industrial relay. True 10 Amp.

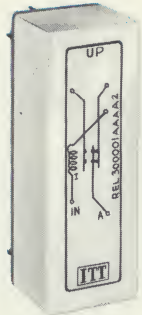

JSR-170 — Miniature, 12 position ceramic rotary switch constructed for rugged operation; offers quality where space is at a premium.

JSR-325 — The first instrument grade multi-deck rotary switch designed for closely spaced printed circuit board mounting.

JRTA — High quality miniature slide switch designed to fit into printed circuit board track layouts.

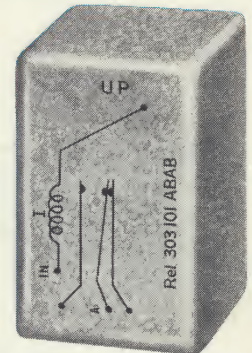

JWAD — Encapsulated printed circuit board relay with one mercury wetted contact, type JWAA-7000.

JWFA — Plug-in mercury wetted relay with one, two, or three contacts, type JWAA-7000.

JWGA — Plug-in mercury wetted relay with one type JWAA-7001 contact.

JWBA — Encapsulated, shielded mercury wetted relay with one type JWAA-7001 contact. For printed circuits.

JWAF — Encapsulated, metal cased mercury wetted relay for printed circuits. Contains one type JWAA-7000 contact.

JWFF — Plug-in mercury wetted relay with one JWAA-7000 contact. Single side or two side stable versions.

JWAL — Printed circuit mercury wetted relay encapsulated in metal case. Available with one, two, or four type JWAA-7000 contacts.

JWBF — Printed circuit mercury wetted relay encapsulated in metal case. Available single side or two side stable with type JWAA-7001 contact.

JWGF — Encapsulated mercury wetted relay in metal case with one type JWAA-7001 contact. 7 pin plug-in mounting or solder terminals.

JWAA-70 — Mercury wetted contact with make before break action. For applications where long life, high speed, constant contact resistance or no bounce are required.

JWAA-71 — Mercury wetted contact with break before make action. Low current, high speed, low profile, center stable adjusted contact.
